

# Be the one to **SAVE** a life...

## Register to be a marrow donor

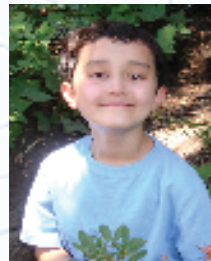

**Connor** is a beautiful 4-year old who is an avid swimmer, loves all things *Ben10*, and considers the Little Mermaid his girlfriend.

In May 2009, Connor was diagnosed with X-linked Hyper IGM, a rare immunodeficiency that causes patients to succumb to liver cirrhosis or lung infection at an early age. Connor never complains about the monthly blood transfusions or about the innumerable flus, stomach aches and other infections he's had since he was born.

### Everyday **6,000** patients search for a life saving match.

Connor's only hope at beating the odds of his disease is a bone marrow transplant. Connor is Korean and because ethnicity is **KEY** in matching patients, Connor's donor will most likely be of the same ethnicity. With the critical shortage of minorities on the national registry, minority patients have a near impossible chance of finding their life saving match.

Nico (9),  
Leukemia(ALL)

Sarah (15),  
Leukemia

Theo(19),  
Leukemia

### **YOU** can help Connor and others like him

It takes 10 mins to join the registry. A consent form and cheek swab is all that is needed. If selected as a match, you will be contacted for further testing, which involves a blood sample. You will then be asked to donate either from your blood (similar to blood donation and used 70% of the time) or marrow. You might be the match that gives someone a second chance to **laugh, love** and **LIVE**.

Register at:

**New Life Mission Church of Colorado**  
**15580 E Hinsdale Cir, Centennial, CO 80112**

**Sunday September 27, 10-2pm**
